

Assignment 01: Input Processing, Decision Structures and Boolean Logic

CSci 233: Application Program Development w/ Python

Objectives

-

Description

Pre-Setup and Configuration

Accept the Assignment to create your repository on GitHub

Clone Repository using SSH to a VSCode Dev Container

Check that Initial Project Files Compile and Run Tests

Assignment Tasks

Question 1 (3 points):

Write a program that will ask the user to enter the amount of a purchase. The program should then compute the state and county sales tax. Assume the state sales tax is 5 percent and the county sales tax is 2.5 percent. The program should display the amount of the purchase, the state sales tax, the county sales tax, the total sales tax, and the total of the sale (which is the sum of the amount of purchase plus the total sales tax).

Hint: Use the value 0.025 to represent 2.5 percent and 0.05 to represent 5 percent.

Additional Information

The following are suggested online materials you may use to help you understand the tools and topics we have introduced in this assignment.
